

*Save Radiata Plateau*

Mr Carr,  
Radiata Plateau must be reserved!

I urge you now to implement the total acquisition of Radiata Plateau and to incorporate it into public ownership as part of the National Estate.

During 1991 you personally acknowledged Radiata Plateau's importance to the community and said "that a Labor Government would investigate the possibility of having Radiata Plateau acquired as open space"—  
(*Blue Mountains Gazette* 15/5/1991).

At the Public meeting for Blue Mountains for World Heritage Listing on August 16th 1991, the motion (put forward by Wyn Jones) 'to include Radiata Plateau in the nominated area for World Heritage' was unanimously carried at the meeting. Your current Minister for the Environment and Conservation, Mr Bob Debus, was present and supported that motion.

Mr Carr, if you don't move now to acquire Radiata Plateau, what on Earth are you waiting for?
