

To: Mrs Roza Sage, Member for the Blue Mountains

The Greater Blue Mountains area is of critical environmental and historic significance. The national parks of the area are World Heritage listed, and the Blue Mountains City Council (BMCC) area lies in a narrow corridor between these parks. Further, the Greater Blue Mountains area is a vital part of the water catchment for our river systems, and hence our fresh water supply.

As such we call upon you as State Member for the Blue Mountains to:

- 1) Publicly declare your opposition to Coal Seam Gas (CSG) exploration and production in the Greater Blue Mountains area; and
- 2) Advocate, both in NSW State Parliament and directly with AGL, for all lands within the Greater Blue Mountains area, including the BMCC area, to be immediately removed from AGL's Petroleum Exploration Licence (PEL2).
